PROFESSIONAL EXPERIENCE

MAPAPROP

FrontEnd Developer

November 2024 - Now

- Design of custom real estate websites based on client requirements, using Figma for visual prototyping.
- Development and implementation of interfaces using PHP, TypeScript, and Tailwind CSS, integrating the websites with the Mapaprop API.
- Development of components and full pages when client requirements cannot be met with the available base templates.
- Autonomous organization of the entire process: requirements gathering, design, development, and delivery of the website, in direct coordination with the Mapaprop technical team.

Technologies: PHP, TypeScript, Vue, Git.

ACCESS INFORMATICA

FullStack Developer

March 2024 - July 2024

- Development of a web application for efficiently managing and visualizing AI chat histories.
- Implementation of a robust authentication system with support for:
 - Custom accounts stored in a non-relational database.
 - Login via Microsoft Outlook using OAuth 2.0.
 - Session management via JSON Web Tokens (JWT) for secure access control and expiration.
 - Integration with Auth0 as an external provider to unify and simplify authentication management.
- Backend logic and endpoint development following the RESTful model, with a focus on security and scalability.
- Collaboration in technical architecture design and functional testing of the application.

Technologies: React, TypeScript, MongoDB, Node.js, Git.

EDUCATION

ORT

CABA, Belgrano

Systems Analyst

2022 - 2024 (Ended)

- Education in software development, systems analysis, databases, and information security.
- Object-oriented programming in Java, using UML for class and architecture design.
- Implementation of the MVC model with C#, and use of design patterns for scalable systems.

SKILLS

Programming Languages

- Java, TypeScript, JavaScript, PHP, C#, Kotlin

Frontend

- HTML5, CSS3, Tailwind CSS, React, Vue.js, Figma (UI Design)

Backend

- Node.js, integración de APIs REST, JWT, Auth0

Databases

- SQL (MySQL) NoSQL (MongoDB)

Software Architecture and Design

- Object-Oriented Programming (OOP), design patterns, UML diagrams

Version Control and Tools

- Git, GitHub, Visual Studio, Visual Studio Code, Eclipse, Postman
